MAIN FEATURES

- * In South Australia during 1975-76 approximately 78 000 claims (a decrease of 6 000 from 1974-75) were lodged under the SA Workmen's Compensation Act, and payments totalling \$46.7 million (an increase of \$10.5 million) were made for wages lost, hospital and medical expenses and lump sum settlements.
- * 18 435 non-fatal accident claims each involving lost time of one week or more were reported as finalised during 1975-76: total time lost as a result of those accidents was slightly more than 96 400 weeks (more than 2 000 man-years of working time). Involved in these accidents were 15 777 males (averaging 5 weeks time lost) and 2 658 females (averaging 6.8 weeks time lost).
- * Of those 18 435 'week or more time lost' accidents 6 030 (32.7 per cent) arose from the handling of materials and other objects; 4 248 (23 per cent) from persons slipping, stumbling or falling; 2 702 (14.7 per cent) from objects moving or falling; 1 324 (7.2 per cent) from use of hand tools; 1 214 (6.6 per cent) from the operation of machinery.
- * Nearly 51 per cent of injuries were strains and sprains compared with lacerations, 16.5 per cent; bruising contusion and other superficial injuries, 15.3 per cent; and bone fractures, 8.6 per cent.

EXPLANATORY NOTES

The statistics contained in this bulletin have been compiled from reports of workmen's compensation claims closed during the year ended 30 June 1976 and of unclosed claims of three years duration at 30 June 1976. Reports are submitted by insurance companies, self-insurers, and State Government departments, through the South Australian Department of Labour and Industry.

Scope and Coverage

Although the term 'industrial accident' is used, the statistics represent workmen's compensation claims finalised during the year ended 30 June 1976. The accidents, to which the claims refer, may have occurred in the year the claim was finalised or during any other year within the coverage of the current collection, i.e. within the previous three financial years. For accidents which occurred since 1 July 1972 and for which the claims had still not been finalised by 30 June 1976, estimates of amounts yet to be paid are included in the statistics : however, there is evidence that the reporting of such claims is incomplete.

Each original claim has been regarded as a separate accident and although reports have been received of re-opened claims, no details of these have been included in the tabulations.

Only persons within the coverage of the South Australian Workmen's Compensation Act, 1971-1974 are included. Notable exclusions are self-employed persons (although following a change in legislation persons supplying labour only in contracts have been included from 1 January 1974) and all Commonwealth Government officers and employees.

The exclusion of self-employed persons is likely to have considerable effect in industries where self-employment is significant (e.g. retail trade, rural industries). Because of the exclusion of Commonwealth Government employees, defence services and Government communications industry groups are not covered, while coverage is reduced in other industries (e.g. building and construction). Because of the movement of employees across State boundaries some reports received may refer to accidents occurring in States other than South Australia. The number of such reports is thought to be negligible.

NOTE: At a late stage of compiling 1974-75 statistics on industrial accidents, deficiencies were found in the coverage of the collection. These deficiencies were relatively insignificant in 1970-71 but had become highly significant by 1974-75. Therefore it was decided not to publish a 1974-75 issue of this bulletin. A general indication of the extent of deficiencies in the coverage of total claims and those involving time lost of one week or more is provided in the APPENDIX to this bulletin.

Coverage of non-fatal accidents for 1975-76 is considered to be acceptably accurate but the problem of inadequate reporting is still evident in respect of fatal accidents. Therefore, all details in respect of fatal accidents have been excluded from 1975-76 figures.

Definitions

For the purpose of this collection the following definitions have been adopted:

INDUSTRIAL ACCIDENT A compensated work injury causing death or absence of the injured person from work for one week or more, but excluding disease cases and accidents during journeys or recess periods if the victim is not engaged in normal occupational duties. 'One week' has been interpreted as one week of seven calendar days or five working days.

FATAL ACCIDENT So classified regardless of the time intervening between injury and death, provided that death occurs before the claim is closed or regarded statistically as closed.

ACCIDENT FACTOR Interpreted in general as that underlying agency, other than human failing, which appears to contribute most materially to an accident and which would be most likely to receive attention in preventing recurrence of a similar accident.

TIME LOST The actual time lost from work except that persons reported to be totally and permanently incapacitated as a result of a compensatable work injury are statistically allotted a duration of incapacity of 156 weeks.

AMOUNT PAID Includes compensation for wages lost, hospital and medical expenses, and lump sum settlements.

INDUSTRY Classified in accordance with the 1969 Preliminary Edition of the Australian Standard Industrial Classification (ASIC). Industry coding was previously based on the 1966 Census Classification List of Industries and hence industry classifications in this bulletin are not strictly comparable with previous issues.

OCCUPATION Classified in accordance with the 1971 Census Classification of Occupations.

INDUSTRIAL DISEASE Special note should be taken of the distinction between 'Injury' and 'Disease' cases in these statistics.

The International Labour Office distinguishes an occupational disease from a work injury in that it exhibits one or more of the following characteristics:

- (i) the slow and protracted nature of its cause;
- (ii) its ascribability to repeated or continuous action of a mechanical, physical, or chemical cause; it is not the effect of a single event but of a cause acting imperceptibly and constantly;
- (iii) indeterminateness of the time of its beginning due to its slow and insidious development;
- (iv) the possible importance of individual predisposition as a factor in the development of the pathological conditions.

The definition of a disease case used in these statistics conforms with the above distinction.

Additional Information

This bulletin includes only the more frequently required tables. Some more detailed tabulations are available on request to this Bureau or to the South Australian Department of Labour and Industry.

Symbols Used

Throughout this publication, the following symbols have been used:

| | |
|------|---|
| n.a. | not available for publication |
| .. | not applicable |
| - | nil or less than half the final digit shown |
| — | break in continuity of series (where drawn across a column between two consecutive figures) |

Rounding

In tables any discrepancies between totals and sums of components are because of rounding.

APPENDIX

REVISED SERIES

Claims and Compensation Paid

Revised numbers of all effective claims lodged with insurance companies, self-insurers and State Government departments (including claims involving work absences of less than one week, journey and recess cases) and of amounts paid on all claims current during each year are shown below.

The figures have been revised by obtaining appropriate returns from organisations previously omitted from coverage.

CLAIMS LODGED AND COMPENSATION PAID

| | Number of Effective Claims Lodged | | Value of Compensation Paid (on all claims current during year) | |
|---------|-----------------------------------|------------------------|---|------------------------|
| | Revised Series | Previously Recorded | Revised Series | Previously Recorded |
| | Number | | Dollars | |
| 1970-71 | 56 600 | 56 300 | 7 700 000 | 7 688 100 |
| 1971-72 | 61 000 | 59 700 | 10 600 000 | 10 406 700 |
| 1972-73 | 75 000 | 71 100 | 15 400 000 | 14 959 700 |
| 1973-74 | 87 000 | 78 100 | 21 300 000 | 19 727 600 |
| 1974-75 | 84 000 | (a)68 800 | 36 200 000 | (a)32 361 500 |
| 1975-76 | 78 000 | .. | 46 700 000 | .. |

(a) Not previously published.

Attempts to obtain improved data on fatal accidents have proved unsuccessful and no attempt has been made to estimate those figures, or, revised data for disease cases.

However, estimates have been made for claims involving time lost of one week or more. No completely acceptable estimation procedure could be determined and the figures provided for years to and including 1974-75 should be regarded as giving an indication of trends only.

(b) Not previously published.

Classification: Possible Effects of Deficient Coverage

It appears probable that deficiencies in coverage for the period 1970-71 to 1974-75 did not significantly distort the percentage distribution of cases between major categories within the classification 'accident factor', 'nature and location of injury', 'day of occurrence' and 'month of occurrence'.

The distribution of cases between industry groups for 1974-75 (unpublished), and possibly some other years, appears to have been distorted but no precise assessment is possible because the basis for industry classification has been changed.
